#### Fractured tooth repair

Treatment details  
with a fractured front tooth due to a fall.  
Repair the broken part by disinfecting and filling  
with resin.

• One visit • first aid  
• about 20min.

Side effects/risks  
Depending on how they fit together, there is a possibility of  
breakage after treatment.  
If pain occurs, additional treatment may be required.

Director Yoshihisa Tajima
